

After Urological Surgery: cystoscopy, ureteral stent insertion/removal, bladder/prostate biopsy

1. For the next 24 hours, increase the amount of fluid you drink. Drink at least 8 to 12, 8-ounce glasses of fluids.
2. Expect to urinate more often, feel burning when you urinate, and pink-tinged urine for the next 2 to 3 days.
3. If you have pain, use Tylenol, Motrin, or Advil if no other pain medication has been prescribed for you.
4. Contact your medical staff fellow below via the NIH page operator at **301-496-1211** if you have any of the following:
 - fever
 - chills
 - foul-smelling urine
 - bright red blood or blood clots in urine and/or stool
 - severe abdominal pain
 - inability to urinate, with or without your bladder feeling full. Your lower abdomen will feel firm over the bladder area, and you might or might not feel pain.
5. If you are unable to urinate and/or have a lot of bleeding, and you are unable to contact a doctor at NIH, go to the nearest hospital emergency room.
6. If you have problems or questions, contact your surgeon and surgical staff fellow via the NIH page operator at **301-496-1211**.

Other Instructions:

Contacts (Reach the staff members below through the NIH page operator at **301-496-1211**.)

Your Doctor:

2004
